

# TOGETHER WE COMPOSE, PLAY AND DISTRIBUTE OUR SONGS

I will tell you, how you can use our publishing house for distributing your cultural value (compositions, lyrics).

1. You should be member in one of the copyright societies like GEMA, AKM, OSA, SOSA, SACEM, PRS, SUIZA or something else. If you are not, we can help you to become (gratuitous of course).
2. You give some (or all) of your songs in our publishing company. We need the notes as PDF data and also midifiles. If you need help, we will also support you.
3. Our music books are distributed whole over Europe and professional musicians play the songs. If you get our notebook (within your songs too) you should also distribute it, so other musicians and composers can contact us and will become a part of us to participate in our system. The songs should be played and written in the program lists of that copyright society, in which country you play and finally the lists should be sended to them. You should also make a copy of the lists and send it to us for controlling the accountancies through us.
4. Our Edition is a cooperation between very successful publishing companies, in which composers, authors and musicians help
5. together to distribute their songs and repertoire, also for creating of new culture. The financial aspect, the legal entitled royalty claim, is a very important and pleasant detail.
6. The membership in our organization is free of charge and based on a correct cooperation and confidence.

## IT IS VERY SIMPLE, WHAT TO DO:

**We can – because of our internationality and relationships – guarantee the distribution and presentation of your songs, which are published in our company!**

**In this cooperation we expect from you:**

1. **Play your own songs,**
2. **play the songs from the other musicians of our publishing company,**
3. **notificate the songs in the lists and inform the responsible copyright society (GEMA, SUIZA, AKM....),**
4. **copy the lists and send it to us.**

We will welcome any questions you may have. All the best!

**Music is not an economic thing, but a lot of people live on it!**

**( Quotation: Dr. Thomas Gräfe, München )**
